ASOR Syrian Heritage Initiative (SHI): Planning for Safeguarding Heritage Sites in Syria¹
NEA-PSHSS-14-001

Weekly Reports 16–17 – December 1, 2014

Michael D. Danti and Cheikhmous Ali

Heritage Timeline

**November 26, 2014**

DGAM posted a short report from the Idlib Department of Antiquities detailing vandalism at the archaeological site of **Tell Ramla**. SHI Incident Report SHI14-093.  

DGAM posted a short report from the Idlib Department of Antiquities detailing illegal construction at the archaeological site of **Kafr Hawar**. SHI Incident Report SHI14-092.  

DGAM posted a short report from the Idlib Department of Antiquities detailing illegal construction, vandalism, and illicit excavations at the archaeological site of **Balyun**. SHI Incident Report SHI14-091.  

**November 25, 2014**

APSA and DGAM reported that an airstrike in Raqqa damaged the façade, main entrance, and windows of the **Raqqa Museum**. SHI Incident Report SHI14-090.  

APSA reported on information released by **Tayyibat al-Imam Media Office** regarding a mosaic uncovered by Opposition forces at **Tell al-Seman** in Hama Governorate. SHI Incident Report SHI14-089.  

**Kirkuk Now and Rudaw** reported that Islamic State destroyed the **Shrine of Sheikh Ismail** south of Kirkuk. posted a short report from the Idlib Department.  
http://rudaw.net/arabic/kurdistan/261120144
http://kirkuknow.com/arabic/?p=39867#ixzz3KCDtv1q4

¹ This report is based on research conducted by the “Syria Preservation Initiative: Planning for Safeguarding Heritage Sites in Syria.” Weekly reports reflect reporting from a variety of sources and may contain unverified material. As such, they should be treated as preliminary and subject to change.
November 24, 2014  
DGAM posted a short report from the Idlib Department of Antiquities that IDPs have taken up residence in the Byzantine ruins of Shinshara/Khirbet Hass [the DGAM’s Shinshrah] in the UNESCO World Heritage Site, Ancient Villages of Northern Syria. SHI Incident Report SHI14-088.  

•  

November 22, 2014  
APSA released 25 photos and a video showing the current state of the Bab al-Hadid and the Suq al-Zeher in Aleppo. SHI Incident Report SHI14-087.  

•  
DGAM reported the recovery of three funerary sculptures from Palmyra Taibul Tomb (H) of the Southeast Necropolis. SHI Incident Report SHI14-086.  

November 20, 2014  
•APSAPosted its third report on the looting of Apamea with 31 photos. SHI Incident Report SHI14-085.  

•  
DGAM posted reports on the condition of Tell Sheikh Hasan in Raqqa Governorate. The site has been looted and Islamic State extremists have allegedly blown up a shrine, presumably Sufi, located atop the site. The local community reportedly stopped the illegal excavations. SHI Incident Report SHI14-084.  

November 19, 2014  
DGAM posted a short report from Idlib Department of Antiquities detailing damage from illegal excavations at Kafr Aqab, UNESCO World Heritage Site, Ancient Villages of Northern Syria. SHI Incident Report SHI14-083.  

November 17, 2014  
DGAM posted a short report from Idlib Department of Antiquities on the state of Harim Castle. SHI Incident Report SHI14-082.  

See also the APSA video of 2012  
Military and Political Context

The primary theaters of combat in Syria and Iraq during the reporting period included:

1) The southeast Aleppo countryside, where a coalition of Salafist forces including Jabhat al-Nusra are gaining territory in their attempt to capture the SARG-controlled al-Safira industrial facility;

2) The northwest Aleppo countryside, where Jabhat al-Nusra, Islamic Front, and FSA forces are besieging regime positions (allegedly supported by local Afrin-area YPG) in the villages of Nubl and Zohra in an attempt to secure new supply lines from the Turkish border;

3) Clashes in the Eastern Ghouta area of Damascus between Islamist groups vying for control of rebel activities there;

4) Ongoing clashes in Kobani between YPG and Islamic State;

5) Clashes between rebel forces and the regime in the Qalamoun area;

6) Northern Iraq, where Islamic State has lost territory in Salah al-Din Province (esp. the Baiji area where there are ongoing clashes between Islamic State and Iraqi forces) and in the hotly-contested Diyala region;

7) Kirkuk, where Islamic State appears to be attempting to shift Peshmerga forces away from Sinjar and Diyala by focusing efforts south and west of the city;

8) Ramadi in Al-Anbar Province, which continues to be threatened by Islamic State forces;

9) U.S./Coalition airstrikes in the areas of Ramadi, Kirkuk, and north of Raqqa;

10) Intensive SARG airstrikes on Raqqa.

In Iraq, Islamic State strategy continues to center on controlling key routes in and out of Baghdad in an apparent attempt to contain Iraqi offensive capabilities and consolidate IS’s southern front at this key choke point. Attacks in the Kirkuk area were accompanied by at least one reported intentional destruction of a heritage place — Islamic State reportedly blew up the Shrine of Sheikh Ismail south of Daquq in the village of Hbejh (46km south of Kirkuk city). Another unverified Islamic State destruction of a heritage place — the Church of St. George north of Mosul — was reported in news media and will be further investigated by ASOR CHI. The acceleration of Islamic State activity in northern Iraq seems to be placing cultural heritage at heightened risk similar to the situation earlier in the year when IS forces moved on Mosul. The situation in Syria continues to place heritage at high risk, and the number of

---

weekly heritage incidents has remained elevated. Most distressing are the reported incidents in the Dead Cities region of northwest Syria.

**Key Heritage Recommendations and Actions**

1) Accelerated Islamic State activity in northern Iraq appears to be associated with renewed intentional destructions of heritage places.

*ASOR CHI will continue to gather data on these destructions and seek to verify these claims. In the past, some claims were found to be false, exaggerated, or speciously attributed to Islamic State, although generally IS uses such attacks to create waves of IDPs to hinder their opponents and to deepen sectarian and ethnic divisions. Such a strategy has the potential to fuel tensions in the Kirkuk area, increasing already cumbersome security demands on KRG Peshmerga forces in and around the city.*
Incident Reports

SHI 14-082

Report Date: November 28, 2014

Site Name: Harim Castle

Date of Incidents: 2012–2013

Location: Idlib Governorate, 55 km west of Aleppo on Turkish border

Coordinates: Lat. 36.207360, Lon. 36.519263

Site Description: According to Burns, “The town [of Harim] dates back at least to late Byzantine times but its main asset is a 12th century Ayyubid fortress that dominates the centre of the town from a partly artificial mound.”

Site Date: Late Byzantine–Mamluk

Source of Destruction: The DGAM reports “few illegal excavations” in the area of the market. Some damage has occurred to walls during combat since 2012. The iron gates and bars protecting the castle interior have all been removed except the main gateway, and the secret entrances into the castle have been blocked with stone. Excavation equipment has been stolen from the main storehouse, and a new brick structure has been erected at the top of the castle for use by “armed gangs.”

Pattern: Minor looting. Urban warfare.

Monitoring Recommendations and Mitigation Measures: Harim has not been a high priority for ASOR SHI monitoring efforts. The site has high potential for mitigation efforts, but the current security situation may prevent implementing even small-scale projects.

**SHI 14-083**

**Report Date:** November 28, 2014

**Site Name:** Kafr Aqab, UNESCO World Heritage Site, Ancient Villages of Northern Syria (Jebel Wastani Park)

**Date of Incident:** Unspecified

**Location:** Idlib Governorate

**Coordinates:** Jebel Wastani Park (Lat. 36.034167, Lon. 36.447294)

**Site Description:** Little information is available on Kafr Aqab. Time has not permitted a thorough search through Tchalenko.

**Site Date:** Byzantine

**Source of Destruction:** According to the Idlib Department of Antiquities, the site has suffered from vandalism and illicit excavations.

**Pattern:** Looting of sites in the parks included within the UNESCO World Heritage Site, Ancient Villages of Northern Syria.

**Monitoring Recommendations and Mitigation Measures:** ASOR SHI has already designated the parks within this UNESCO WHS as high priorities for monitoring and remediation efforts.

**Sources:**

**Online Reporting:**

SHI 14-084

**Report Date:** November 28, 2014

**Site Name:** Tell Sheikh Hasan

**Date of Incident:** Unspecified

**Location:** Raqqa Governorate ca. 50 km. north of Raqqa on the left bank of the Balikh River — not to be confused with Tell Sheikh Hassan in the Euphrates region.

**Coordinates:** Lat. 36.327092, Lon. 39.051305

**Site Description:** Archaeological mound 50–55 km north of Raqqa with substantial deposits of the Byzantine period. The DGAM reports that a shrine on the summit of the mound, probably a Sufi shrine, was destroyed by Islamic State “similar to the rest of the shrines in the area.” The DGAM also reports small-scale subsistence looting. DGAM reports,

According to the information received from Tell Sheikh Hasan (located in the left bank of Balikh river in northern Syria 50-55 km north of Raqqa), the site had previously been subjected to acts of excavation and digging by antiquities small groups thieves without using machines.

The shrine which was built on the site was bombed by ISIS similar to the rest of the shrines in the area. The illegal excavations stopped currently in favor of the local community cooperation in protecting the site.

The excavations results in Tell Sheikh Hasan indicate the existence of several buildings, churches, Hamams and residential houses dating back to the Byzantine period; as well as potteries and ceramics dating back to the Mamluk and early Abbasid era.

**Site Date:** Roman-Parthian, Byzantine, Abbasid, Mamluk

**Source of Destruction:** Illegal excavations of the Byzantine deposits. ISIL intentional destruction of a [Sufi?] shrine atop the mound. Comparison of Digital Globe imagery from June 11, 2008 and June 19, 2014 shows no substantial looting activity or evidence of the shrine allegedly destroyed by ISIL. Perhaps it was located in one of the nearby villages?

**Pattern:** Alleged ISIL intentional destruction of built heritage. Alleged small-scale subsistence looting.

**Monitoring Recommendations and Mitigation Measures:** ASOR SHI may request new satellite imagery of Tell Sheikh Hasan. The most recent Digital Globe image dates to June 19, 2014. DGAM reports that locals are now protecting the site.

**SHI 14-085**

**Report Date:** November 28, 2014

**Site Name:** Apamea (See also SHI 14-034)

**Date of Incident:** Unspecified (during period of SARG control)

**Location:** Apamea, Hama Governorate, 55 km north of Hama

**Coordinates:** Lat. 35.42124, Lon. 36.40165

**Site Description:** According to Ross Burns,

> The mound of Qalaat Mudiq (‘fortress of the defile’) lies west of the classical walled city and is still occupied by some of the town’s inhabitants. The mound, an artificial accumulation on a natural rocky outcrop, has indications of settlement going back at least to the Bronze Age. The site was chosen as the location for one of the four cities founded by Seleucus I Nicator at the end of the fourth century BC. Originally named Pharmake, the name was changed to Apameia to honour Seleucus’ Persian wife, Apama [...]. In 64 BC, Apamea was taken by the Romans under Pompey and its citadel was razed. Under Roman rule, it was again favoured as a military base. The theatre, baths, temples, and villas, constructed during the town’s peak period of prosperity, the boom years of the second century AD, were perhaps initiated when Trajan ordered the rebuilding of the city after a severe earthquake in 115. The colonnaded main street was completed in its present form under Marcus Aurelius (161–80) and served both as an axis and a market, lined with stalls and shaded arcades.

**Site Date:** Various, mainly Hellenistic, Roman, Byzantine, Medieval, and Ottoman

**Source of Destruction:** APSA previously posted two videos filmed by Thabet Ismael that highlight the clandestine operations underway at Apamea. The second video in particular shows the official army checkpoint, earth dikes, and the installation of heavy weapons in the archaeological area.

The APSA report attributes the damage to two primary causes: the conversion of the site into a military camp and the intentional looting of the site. The former has meant the presence of tanks and the digging of trenches, while the latter has resulted in pits up to two meters deep. The number of pits far exceeds the excavated areas from the Belgian archaeological mission (aerial photographs from April 2013 showed over 5,000 looter holes), highlighting the massive scale of the illicit digging.

**Pattern:** Looting and vandalism of archaeological sites during militarization.

**Monitoring Recommendations and Mitigation Measures:** ASOR SHI has already designated Apamea a high priority site for monitoring.

Site Name: Palmyra — Palmyra, Southeast Necropolis, Taibul Tomb (Tomb H), UNESCO World Heritage Site, Ancient City of Palmyra (see also SHI14-019, 023, 027, 073)

Date of Incident: Unspecified

Location: Homs Governorate

Coordinates: —

Site Description: Tomb H of the Southeast Necropolis of Palmyra (UNESCO World Heritage Site, Site of Palmyra, 1980) is a subterranean tomb of the 2nd–3rd centuries AD. Several tombs were scientifically excavated in this area by a Japanese mission headed by Kiyohide Saito (Archaeological Institute of Kashihara, Nara) between 2001 and 2004. Subsequently these tombs were conserved and used as site museums.

Site Date: 2nd–3rd Centuries AD

Source of Destruction: Theft from site museum. The perpetrators and the circumstances of the original theft and the sculpture’s recovery are currently unknown. Cunliffe notes, “It has been suggested that at Palmyra government troops were involved [in looting], or at least complicit, as from their base in the ruins, any looting would theoretically have been visible to them, although this cannot be verified.”

The DGAM Annual Report 2013 states,

Digs are spreading within the southeastern cemeteries area [of Palmyra] previously excavated in an attempt to open some of them. Furthermore, it is not possible, for the time being, to estimate the extent of the damage caused by these digs prior to carrying out detailed inspection as well as removing the dust covering those graves.

In early 2014, the DGAM announced the recovery of large numbers of antiquities, including material from Palmyra,

The DGAM has returned more than 4000 archaeological artifacts during the past year through confiscations carried out by the concerned bodies (the police, the customs, the governorate, the municipalities and other public bodies) in Damascus, Tartus, Palmyra, Homs, Hama, Deir ez-Zor, etc. Furthermore, the concerned authorities returned a treasure containing 1600 silver-plated bronze coins, discovered in the region of al-Shaer mountain between Palmyra and Homs, in addition to tens of artifacts which were about to be smuggled since June 2013.

Pattern: Looting during militarization of archaeological site by SARG.

---

8 DGAM 2014: 19.
9 DGAM 2014: 23–24.
**Monitoring Recommendations and Mitigation Measures:** Several incidents of theft are known from Palmyra that occurred prior to the inception of SHI in August 2014 (see esp. the lists of incidents compiled by Emma Cunliffe). The chronology of thefts and their reporting is difficult to disentangle. Numerous Palmyrene objects are likely circulating through the illegal antiquities markets. SHI is currently completing Incident Reports for previous alleged and verified thefts. Palmyrene material culture is well documented and stylistically distinct, and is therefore readily traceable. This poses high risks of prosecution for the dealers and buyers of illicit Palmyrene antiquities.

**Sources:**

**Online Reporting:**

APSA website covered the recovery of nine Palmyrene sculptures by the Palmyra Department of Antiquities.

DGAM Website — one photo and short report.

**Report Date:** November 28, 2014

**Site Name:** Bab al-Hadid (Bab al-Qanat) and “Suq al-Zeher” [presumably the Suq Bab al-Hadid], Aleppo, UNESCO World Heritage Site, Ancient City of Aleppo (See also SHI 14-015)

**Date of Incident:** 2012–present

**Location:** Northeast corner of the old city at Khandak Street. UNESCO WHS, Ancient City of Aleppo

**Coordinates:** 36°12′11.96″N, 37°10′2.35″E

**Site Description:** According to Gaube and Wirth, “Nordosttor der Stadt, alter Name auch Bab al-Qanat, Bauinschriften des Qansuh von 1509, Torbeschlag mit dem Namen des Qansuh von 1509.” The market (suq) is located just inside the gate.

**Site Date:** Ayyubid — reign of Az-Zahir Ghazi (1172–1216 CE) and Al-Aziz Muhammad (r. 1216–1236 CE). Rebuilt in Mamluk Period.

**Source of Destruction:** Urban warfare

**Pattern:** Combat damage in the UNESCO WHS, Ancient City of Aleppo

**Monitoring Recommendations and Mitigation Measures:** ASOR SHI has already designated the Old City of Aleppo a high priority for monitoring.

SHI 14-088

**Report Date:** November 28, 2014

**Site Name:** Shinshara/Khirbet Hass, UNESCO WHS Ancient Villages of Northern Syria

**Date of Incident:** Unspecified

**Location:** Idlib Governorate

**Coordinates:** Lat. 35.640318, Lon. 36.569242

**Site Description:** According to Warwick Ball,¹¹

...a vast area of ruins that includes the remains of no less than seven churches. There are also many monumental mausolea and a number of other domestic and public buildings, including a public assembly hall with a courtyard lined by Doric porticos.

**Site Date:** Byzantine

**Source of Destruction:** The DGAM reports,

Idlib Antiquities reported that many families have been displaced at [to] Shinsrah archaeological site, most of them were came from the neighborhoods countryside. The new residents live in the ruins of the historic Roman palaces [SIC, churches, etc.] roofed with nylon [tarps] or thin metal boards [tin sheeting], and some of them built new rooms closed to the ancient walls.

It is worth mentioning, that Shinsrah one of the important sites dated from the Roman and Byzantine eras, it is located within the "Park of al Zawia Mountain", which is one of five parks includes about 38 villages registered in the list of "UNESCO" World Heritage in Ancient villages in North of Syria file and currently classify as site endangered.

**Pattern:** Use of built heritage for shelter by IDPs, particularly in the Dead Cities region.

**Monitoring Recommendations and Mitigation Measures:** SHI has already designated the Dead Cities as a high priority for monitoring and remediation efforts.

Site Date: November 28, 2014

Site Name: Tell al-Seman (Tell Zamyoun)

Date of Incident: Mosaic discovered May 11, 2014

Location: Hama Governorate north of modern Tayyibat al-Imam

Coordinates: Lat. 35.287144, Lon. 36.722218

Site Description: According to the APSA website,

Information released by the Tayyibat al-Imam Media Office suggest that rebels of the opposition found a mosaic panel on the hill where the Checkpoint of Tell al-Seman was situated, about 1 km north of Tybet el-Imam. On May 11 2014, the rebels re-took control of the Checkpoint and they built a dyke using a bulldozer and broke the corner of a mosaic panel discovered by chance. Based on the latest information this panel which measures approximately 5 x 5 m was still present on the spot when the army of the regime resumed control of the Checkpoint. Since then the destiny of this mosaic is unknown and no new information has been released.

Site Date: Probably Roman/Byzantine

Source of Destruction: Militarization of archaeological site.

Pattern: Militarization of archaeological site.

Monitoring Recommendations and Mitigation Measures: APSA will continued to follow this case.

**Report Date:** November 28, 2014

**Site Name:** Raqqa Museum

**Date of Incident:** November 25, 2014

**Location:** Modern Raqqa, Raqqa Governorate

**Coordinates:** Lat. 35.945867, Lon. 39.016744

**Site Description:** According to the DGAM,

The museum hosted in a historical building built in 1861 as a Seray Building (government building) and was founded as a museum in 1981, this museum curated large collections of the Ar-Raqqah province.

**Site Date:** Ottoman Seray converted to a provincial museum. Repository for collections of all time periods found in the Raqqa Governorate and headquarters of the Raqqa Department of Antiquities and Museums.

**Source of Destruction:** According to the DGAM,

A bomb dropped around the museum area resulting the damage to the main facades although complete damage to the doors and and [SIC] actual breakage of glass windows occurred. Ar-Raqqah Antiquities reported that the heavy damage occurred in main facade facing to the Arafat Square.

**Pattern:** Airstrike damage. There is no mention in the DGAM reporting that this was a SARG airstrike.

**Monitoring Recommendations and Mitigation Measures:** ASOR SHI has already designated Raqqa a high priority for monitoring and remediation efforts.

SHI 14-091

**Report Date:** November 28, 2014

**Site Name:** Balyun (Balion, Baluon)

**Date of Incident:** Unspecified

**Location:** Balion is a village in the Jebel Zawiyah in Idlib Governorate

**Coordinates:** Modern town Ca. 35.695608, 36.508486, Site ca. Lat. 35.692414, Lon. 36.487593

**Site Description:** One of the many sites of the Dead Cities region. The site lies northwest of Al-Bara and just east of Serjilla.

**Site Date:** Roman/Byzantine

**Source of Destruction:** DGAM reports,

Antiquities of Idlib reported that Balyun archaeological site (which is rich with its archaeological caves and Roman water reservoirs), suffer from illegal buildings built close to the ancient walls, the archaeological tank turned into a garbage dump, in addition to systematic illegal excavations that took place in the site. The digs revealed a cave excavated recently and drilling tools [excavation picks] still in place.

Balion and the surrounding area have seen particularly intense fighting in 2014.

**Pattern:** Illegal construction and excavations — the excavations shown in the photos seem to be associated with waste water drainage and house construction rather than antiquities looting.

**Monitoring Recommendations and Mitigation Measures:** —
