- Suspected Russian airstrike damages an unnamed mosque in al-Tarn, Raqqa Governorate. **ASOR CHI Incident Report SHI 17-0091**
- Syrian forces reportedly shell Othman Bin Affan Mosque, Deir ez Zor Governorate. **ASOR CHI Incident Report SHI 17-0092**
- Newly released photographs show reconstruction of Bahramiya Mosque, Aleppo Governorate. **ASOR CHI Incident Report SHI 17-0093**

Iraq

- New photographs were released of damage to libraries in Mosul, Ninawa Governorate. **ASOR CHI Incident Report IHI 17-0016 UPDATE**
- New photographs and reporting provide additional detail on damage to Hatra, Ninawa Governorate. **ASOR CHI Incident Report IHI 17-0024 UPDATE**
- Video shows an RPG rocket striking dome of al-Nuri al-Kabir Mosque, Ninawa Governorate. **ASOR CHI Incident Report IHI 17-0025**
- New photographs show damage to the Maltai Reliefs, Dohuk Governorate. **ASOR CHI Incident Report IHI 17-0026**

- New video footage details the condition of Mar Kurkees Church, Ninawa Governorate. **ASOR CHI Incident Report IHI 17-0027**
- New photographs show the current condition of Dair Mar Elia, Ninawa Governorate. **ASOR CHI Incident Report IHI 17-0028**
- Photographs and video footage show extensive damage to al-Mufti Mosque, Ninawa Governorate. **ASOR CHI Incident Report IHI 17-0029**
- Photographs shows extensive damage to al-Sawaf Mosque, Ninawa Governorate. **ASOR CHI Incident Report IHI 17-0030**
- Video footage show extensive damage to Yehia al-Talib Mosque, Ninawa Governorate. **ASOR CHI Incident Report IHI 17-0031**
- New photographs and video show cleanup and reconstruction efforts taking place at Mosul University, Ninawa Governorate. **ASOR CHI Incident Report IHI 17-0032**
- Video footage and photographs show condition of and damage to Mar Mikhael Monastery, Ninawa Governorate. **ASOR CHI Incident Report IHI 17-0033**
- Video footage and photographs show condition and damage to Mar Gorgis Monastery in Ninawa Governorate. **ASOR CHI Incident Report IHI 17-0034**
- DigitalGlobe satellite imagery shows damage to Baha'a al-Deen al-Sumaeda'e Mosque, Ninawa Governorate. **ASOR CHI Incident Report IHI 17-0035**
- DigitalGlobe satellite imagery shows damage to al-Najjar Mosque, Ninawa Governorate. **ASOR CHI Incident Report IHI 17-0036**
- DigitalGlobe satellite imagery shows damage to al-Shahid Muhammed Mosque, Ninawa Governorate. **ASOR CHI Incident Report IHI 17-0037**

Libya

- Tell B 10 has been destroyed and replaced by a modern villa, al Khums Governorate. **ASOR CHI Incident Report LHI 17-0002**
- Ongoing urban encroachment and excavation have damaged the Roman Wall, Derna Governorate. **ASOR CHI Incident Report LHI 17-0003**
- Private developers have torn down a historic building in Tripoli, Tarabulus Governorate. **ASOR CHI Incident Report LHI 17-0004**

Military and Political Context

The main theaters of military operations during the reporting period in Syria were:

1. Raqqa Governorate:
 - During the reporting period, local reporting groups Raqqa is Being Slaughtered Silently (RBSS) and the Syrian Network for Human Rights (SNHR) reported extensive aerial bombardment, resulting in civilian casualties, in villages and town surrounding the ISIL-held city of Raqqa.²
 - During the reporting period, US-backed Syrian Democratic Forces (SDF) recaptured the city of Tabqa from ISIL militants. The SDF allowed ISIL fighters to retreat from al-Tabqa, with conditions, without informing the US-led Coalition who targeted the fleeing militants with aerial bombardment.³
2. Aleppo Governorate:
 - On May 3, a car bombing struck a “headquarters for the interim government” in the Syrian opposition-held town of Azaz, killing at least five people. No group claimed responsibility for the attack.⁴
 - On May 11, SARG airstrikes targeted ISIL-held villages in Aleppo Governorate. The strikes killed thirteen people in the town of al-Maskaneh. Clashes between SARG and ISIL militants occurred around al-Jarrah military airport.⁵
3. Rif Dimashq Governorate:
 - During the reporting period, clashes continued between Syrian opposition group Jaish al-Islam, the al-Rahman Corps, and al-Qaeda linked Levant Liberation Committee (formerly Hayat Tahrir al-Sham) in the area of Eastern Ghouta.⁶
 - On May 2, an International Committee of the Red Cross (ICRC) aid convoy was able to reach the besieged town of Douma for the first time since October 2016.⁷
 - On May 25, pro-regime forces recaptured several towns and the Damascus-Palmyra Highway following the withdrawal of ISIL militants from large areas of Eastern Qalamoun.⁸
4. Homs Governorate:
 - On May 7, SARG forces captured the village of al-Zalakiyat from ISIL amid heavy bombardment.⁹
 - On May 9, the Syrian military launched a new assault in eastern Homs Governorate, opening up another front against ISIL-held areas in Deir Ez Zor Governorate. On the

⁹ <http://www.reuters.com/article/us-mideast-crisis-syria-fighting-idUSKBN1830IF>

same day, SARG and US-backed opposition forces clashed in southern areas of Homs Governorate.¹⁰

- On May 18, the US military carried out an airstrike against a pro-regime militia near the town of al-Tanf, destroying "at least one tank and a bulldozer" that were part of a convoy of Syrian and Iranian-backed militias that had clashed with Syrian opposition forces. Clashes continued between pro-regime and opposition forces clashed near al-Tanf.¹¹
- On May 20, buses evacuated civilians and opposition fighters from the final opposition-held neighborhood of al-Waer, Homs City.¹²
- On May 23, SARG aircraft began to return to Shayrat Airbase. Following the April 7 US strike on the airbase, SARG forces had relocated most of its aircraft to Damascus and Bassel al-Assad International Airport.¹³
- On May 23, ISIL militants took responsibility for an attack in the majority-Alawite district of Zahraa in the city of Homs that left five people dead and thirty more injured.¹⁴
- On May 25, SARG forces stated that they had recaptured territory from ISIL in a "rapid advance" near the border with Jordan and Iraq.¹⁵
- On May 31, Russian forces launched cruise missiles from the sea against ISIL targets near Palmyra.¹⁶

5. Damascus Governorate:

- On May 8, hundreds of Syrian opposition forces began leaving from the Damascus neighborhood of Barzeh as part of an evacuation deal with the Syrian regime. The opposition forces, which included members of Jaish al-Islam, will be relocated to opposition-held Idlib Governorate over the course of 5 days. Delays resulted in the final evacuees leaving Barzeh on May 29.¹⁷
- On May 14, SARG and opposition forces reached new evacuation agreements and around 1,500 opposition forces and their families were moved from the Damascus-neighborhood of Qaboun to Idlib Governorate.¹⁸
- On May 23, pro-regime forces intercepted two ISIL-suicide bombers near the majority-Shia district of Sayyeda Zeinab in Damascus, forcing both bombers to detonate their devices.¹⁹

6. Deir ez Zor Governorate:
 - On May 17, the US-led Coalition denied allegations that their forces had carried out a May 15 airstrike on the town of Abu Kamal that resulted in dozens of civilian casualties. ISIL-affiliated Amaq News Agency released video footage of the aftermath of the attack, accusing the US-led Coalition of carrying out the airstrikes.²⁰
 - On May 25-26, The Syrian Observatory for Human Rights (SOHR) reported that US-led Coalition airstrikes over the town of al-Mayadin killed over 100 civilians, including 40 children. The airstrikes reportedly targeted the municipality building, which was being used to house family members of ISIL militants.²¹
 - On May 31, a US-led Coalition airstrike killed the founder of ISIL-affiliated media outlet Amaq News Agency.²²
7. Hama Governorate:
 - On May 17, ISIL militants launched an attack against SARG-held villages in Hama Governorate, killing an estimated 50 people including 15 civilians.²³
8. Idlib Governorate:
 - On May 21, ISIL militants detonated an IED and suicide bombing at a meeting of 'Salafi-Jihadist' group Ahrar al-Sham in the area of Tal Touqan in eastern Idlib Governorate. The attack killed at least 25 Ahrar al-Sham forces including the local emir.²⁴
9. Hasakah Governorate:
 - On May 2, ISIL militants attacked a makeshift Syrian and Iraqi IDP camp in Rajm al-Shaddadi, near the town of al-Shaddadi. The attack, which included at least five suicide bombers, killed more than 30 civilians. ISIL militants also clashed with SDF forces located at a nearby checkpoint. Some reports claimed that ISIL militants kidnapped civilians.²⁵
10. Daraa Governorate:
 - On May 29-31, pro-regime forces reportedly deployed reinforcements, including Iraqi and Afghani Shia militias, from Aleppo City and Damascus to the city of Daraa.²⁶

Other Key Points:

- During the reporting period, the US-led coalition conducted airstrikes in the areas of Abu Kamal, Hawl, al-Tanf, Deir ez-Zor, Palmyra, Raqqa, and Tabqa.²⁷

News Release No: [1184832](#), [1183596](#), [1182305](#), [1196637](#), [1182111](#), [1188363](#), [1196235](#), [1188434](#), [1196080](#), [1196009](#), [1190219](#), [1186050](#), [1187654](#), [1192494](#), [1188622](#), [1193431](#), [1195061](#), [1179515](#), [1177144](#), [1175613](#), [1182043](#), [1178309](#), [1181059](#), [1172194](#), [1169142](#), [1174461](#), [1175284](#), [1175374](#)

- During the reporting period, Russian airstrikes were reported over Aleppo, Rif Dimashq, Homs, Hama, and Deir ez Zor Governorates.²⁸
- During the reporting period, “de-escalation zones” negotiated by Russia, Turkey, and Iran took effect. However, clashes and aerial bombardment continued over some areas included in the de-escalation zone. According to the New York Times the “de-escalation zones, envisioned as places where displaced Syrian civilians could voluntarily return, include the northern province of Idlib, the central province of Homs, the Eastern Ghouta region outside Damascus, and southern Syria along the Jordanian border.”²⁹
- On May 1, Human Rights Watch (HRW) released a report revealing evidence that “strongly suggests” that the April 4, 2017 SARG airstrike in the town of Khan Sheikhoun, Idlib Governorate was a chemical weapons attack utilizing a form of a nerve agent.³⁰
- On May 1, the United States Treasury announced “one of the largest sanctions actions in history” which designated “271 employees of Syria’s Scientific Studies and Research Center (SSRC) as responsible for ‘developing and producing non-conventional weapons and the means to deliver them’.”³¹
- On May 3, the Syrian National Coalition (SNC) suspended its participation in peace talks being held in Astana, Kazakhstan citing continued SARG aerial bombardment of opposition held areas.³²
- On May 9, US officials announced that President Trump had approved arming the Syrian Kurdish YPG forces in the fight against ISIL.³³
- On May 15, the United States accused the Syrian government of using a crematorium to hide mass murders at a prison complex in Syria.³⁴
- On May 30, the United States confirmed the first delivery of a small arms shipment to Syrian Kurdish YPG forces in efforts to recapture the ISIL-stronghold city of Raqqa.³⁵

The main theaters of military operations during the reporting period in Iraq were:

1. Ninawa Governorate:
 - On May 4, Iraqi Security Forces (ISF) “opened a new front” against ISIL after a two week stall in advancement. The new offensive will begin from the northern area of the city and will attempt to trap the militants that remain holed-up in the Old City.³⁶

³⁶ <https://www.wsj.com/articles/iraqi-forces-launch-new-push-in-mosuls-west-1493903868>

- On May 12, Popular Mobilization Front (PMF) forces launched an offensive to recapture the areas of Qaiwaran and Baaj from ISIL.³⁷
- On May 29, members of the PMF announced that they had captured several villages near the ISIL-held town of Baaj near the Syrian border.³⁸
- 2. Maysan Governorate:
 - On May 1, ISF began new operations to strengthen security and “mitigate rising tribal violence” in Maysan Governorate.³⁹
- 3. Basra Governorate:
 - On May 2, ISF intervened in tribal clashes in the city of Basra.⁴⁰

Other Key Points:

- During the reporting period, the US-led coalition conducted airstrikes in the areas of Beiji, Haditha, Rawah, Hawijah, Hawl, Kirkuk, Qaim, Rawah, Rutbah, Mosul, Samarra, Sinjar, Tal Afar, and Tikrit.⁴¹

The main theaters of military operations during the reporting period in Libya were:

1. Fezzan Governorate:
 - In May 18, militiamen affiliated with the Misratan Third Force launched an attack against the Libyan National Army (LNA) at the Barak al-Shati airport base, killing 141 Libyan army personnel and civilians. According to LNA sources, many of their members killed were unarmed and had been shot execution style.⁴²
 - On May 18, militants reportedly belonging to the Benghazi Defense Brigades (BDB) carried out an explosives attack that killed a prominent eastern tribal leader and several of his family members as they exited a mosque after Friday prayer.⁴³
2. Jufra Governorate:
 - On May 19, the LNA “heavily bombed” BDB locations in Jufra Governorate. The bombing campaign continued for several days.⁴⁴
3. Derna Governorate:
 - On May 27, the Egyptian Air Force carried out aerial bombardment against “camps and ammunition stores” belonging to the Derna Mujahideen Shura Council (DMSC) located in Dahr al-Hamar and al-Fatayeh.⁴⁵

Other significant political and military events during the reporting period:

- On May 7, US military officials confirmed that an April 2017 US raid in the Nangarhar province of Afghanistan killed an ISIL leader.⁴⁶
- On May 7, American and Jordanian military forces conducted an annual joint exercise and included troops from more than 20 nations. The exercise raised concerns that Jordan may be considering additional military intervention in Syria.⁴⁷
- On May 22, a suicide bomber targeted an arena in the English city of Manchester, killing 22 people who were attending a concert. ISIL later took responsibility for the attack, however no direct link between the bomber and the militant group has been confirmed. Investigations between links to the bomber and ISIL militants in Libya are ongoing.⁴⁸
- On May 26, gunmen, posing as security officers, attacked buses carrying Christian pilgrims in Egypt's Minya province, killing at least 28 people. No group claimed immediate responsibility for the attack but ISIL is suspected.⁴⁹

Incident Report: Syria

SHI 17-0032 UPDATE

Report Date: May 8, 2017

Site Name: al-Kabir Mosque (جامع الكبير)

Date of Incident: Unknown

Location: al-Bab, Aleppo Governorate, Syria

Site Description: Mosque

Site Date: Early 20th Century CE

Incident Summary: Photographs show severe damage to mosque.

Incident Source and Description: On May 8, 2017 APSA published a report on the damage to the al-Kabir Mosque in the city of al-Bab.⁵⁰ The report included photographs depicting the damage to al-Kabir Mosque. Several smaller domes of the mosque have been damaged, and large amounts of debris are present surrounding the mosque.

Pattern: Military Activity: explosives.

Monitoring Recommendations and Mitigation Measures: ASOR CHI will continue to monitor the condition of al-Kabir Mosque, as well as the condition of other heritage sites located in regions subject to ongoing aerial bombardment campaigns and intense military activity.

Report Date: May 1, 2017

Site Name: Ayn Daqnah Village Mosque

Date of Incident: May 1, 2017

Location: Ayn Daqnah (عين دقنة), Aleppo Governorate, Syria

Site Description: Mosque

Site Date: Unknown

Incident Summary: Video footage shows damage to mosque.

Incident Source and Description: On May 1, 2017 media outlet al-Azaz al-Alami published a video that reported to show a Syrian flag and possibly a Kurdish YPG flag flying over a mosque in the village of Ayn Daqnah. The mosque shown in the video appears to have been heavily damaged. The exact date of the damage occurrence is unknown.

According to DigitalGlobe satellite imagery, the western side of the mosque and the minaret were badly damaged between March 17 and March 20, 2016. The minaret has collapsed and much of the western side has crumbled.

Pattern: Military activity: explosives.

Monitoring Recommendations and Mitigation Measures: ASOR CHI will continue to monitor damage to the Ayn Daqnah Village Mosque, as well as the condition of other heritage sites located in regions subject to ongoing aerial bombardment campaigns and intense military activity.

SHI 17-0077

Report Date: May 7, 2017

Site Name: Hamada al-A'lowi Mosque (مسجد حمادة العليوي)

Date of Incident: May 3, 2017

Location: Hneida Village (قرية هنيده), Raqqa Governorate, Syria

Site Description: Unknown

Site Date: Unknown

Incident Summary: Reported US-led Coalition airstrike damages mosque.

Incident Source and Description: On May 3, 2017 Raqqa is Being Slaughtered Silently (RBSS) reported that a US-led Coalition airstrike targeted and destroyed the Hamada al-A'lowi Mosque in Hneida village.⁵¹ RBSS published a photograph of the mosque prior to damage. Photographs released later by RBSS shows the destruction of the mosque to Hamada al-A'lowi Mosque as a result of reported continued bombardment by US-led Coalition aircraft.⁵² Drone footage released by ISIL-affiliate Amaq News Agency shows that the roof of the mosque has collapsed, a portion of the dome remains however has been heavily damaged. The minaret of the mosque remains standing.

SHI 17-0081

Report Date: May 16, 2017

Site Name: Antiquities from unknown sites in Deir ez-Zor Governorate. Possible sites: Halebiye (Zenobia) and/or Dura Europos (Tell Salhiya)

Date of Incident: May 13, 2017

Location: Deir ez-Zor Governorate, Syria

Site Description: Halebiye was fortified in the 3rd century CE by Zenobia, Queen of Palmyra, after whom the site was named in antiquity. After her revolt against the Roman Empire in 273, Halabiye was captured by the Romans and subsequently refortified as part of the Limes Arabicus.

Dura Europos was founded ca. 300 BCE by the Hellenistic Seleucid dynasty at the intersection of strategic trade routes, and soon became a great caravan city. In 113 BCE, the Parthians captured Dura Europos, and it remained largely in their possession until 164 CE, when the city was captured by the Romans. It was then captured by the Sassanians in 256 CE who destroyed the city.

Site Date: Halebiye: Roman-Arabic; Dura Europos: Hellenistic through Sassanian

Incident Summary: New video shows destruction of antiquities in Deir ez-Zor Governorate.

Incident Source and Description: On May 13, 2017 ISIL-affiliated Amaq News Agency released a video showing a member of ISIL destroying antiquities at an unknown location in Deir ez-Zor Governorate.⁵⁶ Al-Arabiya states the artifacts were found by the antiquities authority in the area of Salihia, located near the site of Dura Europos.⁵⁷ In the video two sites are shown, one a cave in red rocks (possibly outside of Dura Europos along the Euphrates), and the other inside of a building (possibly the *Praetorium* in Halebiye). al-Masdar News claims the artifacts are from sites west of Abu-Kamal city. The caption on the video states, "Deir Al-Zour Department - Destruction of statues found by the Antiquities Authority in Salhia, west of Abuqamal."⁵⁸ Salihia is not west of Abu-Kamal, but the objects probably originate near that area. The artifacts shown are a mixture of early and middle bronze age (2nd millennium BCE) statues, modern fakes seen in marketplaces, and statues from Dura Europos (Tell Salahiya) carved in the Palmyrene style (200-280 CE). While the video shows these objects, the member of ISIL is stating that the members of the Sharia Committee decided to destroy the objects because they are idols that are worshiped instead of God.⁵⁹ At the end of the video he takes a sledgehammer to the antiquities, smashing the objects into tiny pieces.

For previous reports of looting in Dura Europos, see **ASOR CHI Incident Report SHI 14-0078** in **Weekly Report 15**; **SHI 14-0098** in **Weekly Report 19**; **SHI 16-0161** in **Weekly Report 117-118**.

Site Name: Hamouriya Grand Mosque (مسجد حمورية الكبير) (al-Kabir Mosque/al-Qadim Mosque)

Date of Incident: May 16, 2017

Location: Hamouriya, Rif Dimashq Governorate, Syria

Site Description: Unknown

Site Date: Unknown

Incident Summary: Reported SARG missiles and shelling damages mosque.

Incident Source and Description: On May 17, 2017 the Syrian Network for Human Rights (SNHR) reported that SARG forces launched “surface-to-surface missiles” on the Hamouriya Grand Mosque in the town of Hamouriya. The strike, which occurred on May 16, 2017, damaged furniture and rendered the mosque inoperable.⁶² Video released on May 19, 2017 shows the front of the mosque has been almost completely destroyed, with only one partial wall and the base of the minaret still standing. The main portion of the mosque, behind the minaret, has severe structural damage to the one side, but is still standing. The rooms are full of rubble. According to local reporting, the missiles also struck residential areas and resulted in civilian casualties.⁶³

The destruction of the Bayyoud Village Mosque (Sharqiya Voice; May 19, 2017)

SHI 17-0086

Report Date: May 23, 2017

Site Name: Dar Maqsid (House of the Restricted)

Date of Incident: May 11, 2017

Location: Bab Qinnasrin, al-Jalloum Neighborhood, Aleppo, Aleppo Governorate, Syria

Site Description: Historic house in the center of Aleppo.

Site Date: 1600 CE⁶⁶

Incident Summary: An old house in Aleppo was purchased and is being dismantled for transport.

Incident Source and Description: On May 11, 2017, Qasioun News Agency reported that a Lebanese businessman had purchased a house in Bab Qinnasrin. This house lies within the UNESCO Ancient City of Aleppo World Heritage Site. It was reported that a wood paneled room inside that house was being dismantled for transport to Lebanon. The house is within the regime-controlled area. It is unknown from who the buyer purchased the house.

According to al-Akhbar, on May 12, 2017 the DGAM suspended the dismantling of the wooden room while it consulted with other officials on the rights to this house. The owner was given approval to transfer “what remains in the house from the objects and woods of Exa after being hit by missiles.” The Department of Ministry of Culture was informed, and in turn informed the Director of Archaeology and Museums. The Aleppo director then stated he formed a committee that stopped the removal of the room. The purchase of the house by a foreigner, under the Syrian Law 11 of 2011 has to go through the Ministry of the Interior. However, in paperwork filed with the Aleppo Department, it is stated the owner is Syrian, not Lebanese. This means the selling of the house did not have to go through the Ministry of Interior. In a document posted by al-Akhbar, the owner was granted permission to take items from the house, including wood, by the leader of the 30th division of the Republican Guard and the head of the security and military section of Aleppo.

The Director of Antiquities and Museums states that, “The transfer of anything from Old Aleppo requires the approval of the Directorate of the protection of the Old City as the competent scientific authority.” He further states he has addressed the Prime Minister, who is supposed to make a decision on this case in the near future. Comparisons are being drawn to the “Aleppo Chamber” taken from Beit Wakil and transferred to the Berlin Museum at the beginning of the 20th century.

According to Medmak, three people were arrested for a different case on the Lebanese border for selling religious monuments from Syria to Lebanon, worth over \$100,000.⁶⁷

Pattern: Reuse of ancient/historic structures (non-combatants); Theft.

Document pertaining to the removal of objects from the house (al-Akhbar; May 12, 2017)

SHI 17-0087

Report Date: May 28, 2017

Site Name: al-Alo Mosque (مسجد العلو)

Date of Incident: May 27, 2017

Location: al-Moroor Neighborhood, Raqqa, Raqqa Governorate, Syria

Site Description: Unknown

Site Date: Unknown

Incident Summary: Newly released video shows damage to mosque.

Incident Source and Description: On May 28, 2017 ISIL-affiliated Amaq News Agency released video footage showing damage to the al-Moroor Neighborhood in Raqqa. Amaq News Agency reported that the damage was due to US-led Coalition shelling in the area. The video shows damage to al-Alo Mosque located near the shelling site. The exterior of the mosque seems to be in relatively good condition, the dome is not damaged and the minaret is still standing. The interior of the mosque shows slight damage with panels lining the floor and missing window panes. There is slight structural damage apparent in small cracks in some of the walls.

The US Department of Defense confirmed that airstrikes took place over Raqqa on the date the video was released, however Amaq does not specify when the damage to the mosque occurred. US-led Coalition airstrikes have been frequent in ISIL-held areas of Raqqa Governorate.⁶⁸ The DigitalGlobe satellite imagery narrows the date of the damage to between May 24 to May 30, 2017.

On May 29, 2017 the Syrian Network for Human Rights (SNHR) reported the same strike, dating the incident as having occurred on May 27, 2017.⁶⁹ SNHR reported that US-led Coalition airstrikes had fired missiles near al-Alo Mosque, causing severe damage.

See associated reports in this Monthly Report for other sites that were hit by airstrikes in the Raqqa Governorate: **ASOR CHI Incident Report SHI 17-0085; ASOR CHI Incident Report SHI 17-0080; ASOR CHI Incident Report SHI 17-0079; ASOR CHI Incident Report SHI 17-0078; ASOR CHI Incident Report SHI 17-0077.**

Pattern: Military Activity: airstrikes.

Monitoring Recommendations and Mitigation Measures: ASOR CHI will continue to monitor damage to al-Alo Mosque, as well as the condition of other heritage sites located in regions subject to ongoing aerial bombardment campaigns and intense military activity.

Report Date: May 28, 2017

Site Name: Bawabat al-Yasmin (بوابة الياسمين)

Date of Incident: May 1, 2017

Location: al-Jdeideh Neighborhood, Aleppo, Aleppo Governorate, Syria

Site Description: Unknown

Site Date: Unknown

Incident Summary: Newly published photographs show reconstruction and stabilization of Bawabat al-Yasimin.

Incident Source and Description: On May 1, 2017, an engineer working with the Aleppo City Government, posted photographs of Bawabat al-Yasmin. Local people reported to the city government that the site appeared to be collapsing. The Aleppo City government then sent out a group of engineers and directors to shore up the arch and stop the collapse. The water main that runs through the gate was also damaged, threatening the historical buildings near the arch. The engineers and water maintenance manager also fixed the line to prevent further damage to the historical area.

The al-Jdeideh neighborhood of Aleppo was severely damaged due to tunnel bombs and explosives in 2015 and 2016. See associated reports in this Monthly Report for other sites that are being reconstructed and cleaned up around Aleppo: **ASOR CHI Incident Report SHI 17-0089** and **ASOR CHI Incident Report SHI 17-0090**.

Pattern: Site Maintenance: re-construction/clean-up.

Monitoring Recommendations and Mitigation Measures: ASOR CHI will continue to monitor damage to the Bawabat al-Yasmin, as well as the condition of other heritage sites located in regions that were recently liberated and are reconstructing heritage sites.

Report Date: May 30, 2017

Site Name: Umayyad Mosque (جامع الأموي)

Date of Incident: May 1, 2017

Location: Aleppo, Aleppo Governorate

Site Description: Ross Burns writes,

"The Great Mosque within the walled city of Aleppo is unjustly given second billing after the Great Mosque of the Umayyads in Damascus. While it lacks the richness of the associations with early Islam and the Roman predecessor on the Damascus site, the Aleppo Great Mosque has its own unique sense of symmetry and calm which owes much to the rebuilding of the mosque in the Ayyubid years, after a disastrous fire. It thus provides us with one of the most striking statements of the purity of form of Islamic medieval architecture.

The site of the mosque was originally at the centre of the ancient city and falls partly on the ground used for the sixth century Cathedral of St Helena (the mother of Constantine). A remarkable madrasa to the west of the mosque, the Madrasa Halawiye, preserves part of the cathedral following its twelfth century conversion to serve as a madrasa. The remains of the cathedral were seized in reprisal following the unsuccessful Crusader assault on Aleppo in 1124 and their sacking of important Shi'ite shrines outside the city."⁷⁰

Site Date: 715 CE; Reconstructed 11th century

Incident Summary: Newly released photographs show reconstruction efforts taking place at al-Umayyad Mosque.

Incident Source and Description: On May 1, 2017 an engineer working with the Aleppo City Government posted photographs of the Umayyad Mosque. Engineers as well as the Awqaf Directorate were strengthening and rebuilding columns in the courtyard of the mosque in order to get ready to reconstruct the more heavily damaged portions. Around the column, they have dug four holes in which to place reinforced steel beams in order to help stabilize the area for more heavy reconstruction later. The engineer also posted photograph of the tomb of the Prophet Zakariah, located inside the mosque, which looks to have sustained little to no damage.

For more information on the damage to the Umayyad Mosque see, **ASOR CHI Incident Report SHI 14-0040 in Weekly Report 9; SHI 14-0059; SHI 15-0015 in Weekly Report 26-27; SHI 15-0084 in Weekly Report 40; SHI 15-0085 in Weekly Report 41; SHI 16-0071 in Weekly Report 93-94; SHI 16-0191 in Weekly Report 123-124; and SHI 16-0192 in Weekly Report 121-122.**

Report Date: May 30, 2017

Site Name: Khan Uch Khan

Date of Incident: May 21, 2017

Location: Aleppo, Aleppo Governorate, Syria

Site Description: The Khan Uch Khan is the oldest Khan outside the old city walls of Aleppo. At the end of the Mamluk era, it was reconstructed by the Sultan Qansoh al-Ghuri.⁷¹

Site Date: Reconstructed ca. 1500 CE

Incident Summary: Newly released photographs show clean-up activities at Khan Uch Khan.

Incident Source and Description: On May 21, 2017 an engineer working with the Aleppo City Government, posted photographs of Khan Uch Khan. The engineer states that the Directorate of Archaeology in Aleppo and an engineer working with the directorate were removing the facade stones of the gate which had fallen off during the conflict. These stones were moved into storage until they can be reset in the gate.

SHI 17-0093

Report Date: May 30, 2017

Site Name: Bahramiya Mosque

Date of Incident: April 22, 2017

Location: Aleppo, Aleppo Governorate, Syria

Site Description: The Bahramiya Mosque is located near the Gate of Antioch and was established by Bahram Pasha Wali of Aleppo during the Ottoman rule in the year 988 AH (1583 CE).⁷³ It was reconstructed in 1698 after an earthquake.⁷⁴

Site Date: 1583 CE

Incident Summary: Newly released photographs show reconstruction of mosque.

Incident Source and Description: On April 22, 2017 an engineer working with the Aleppo City Government posted photographs of the Bahramiya Mosque. The mosque was damaged during the conflict, and local engineers and the Awqaf Directorate have begun efforts to stabilize the columns. It was reported that the engineer and contractor provided their services voluntarily with the support of the Directorate of Awqaf. The wider shots of the courtyard show a damaged fountain and rubble lining the courtyard.

Incident Report: Iraq

IHI 17-0016 UPDATE

Report Date: May 18, 2017

Site Name: Mosul University Library; Mosul Central Public Library

Date of Incident: May 12, 2017

Location: Mosul, Ninawa Governorate, Iraq

Site Description: Mosul University Library - The Mosul Central Library is a system of multiple repositories of research volumes, archives, rare books, maps, and other collections for Mosul University. The library contained 3,500 rare books dating as far back as the early 18th century. The library also contained 5000 government publications dating back to 1921.⁷⁵ The main repository is the Central Library, which holds the primary research collection for the campus. Other libraries across the university's many colleges also have specialized libraries. In 2003 the Central Library was damaged and vandalized. Between 2003-2014, the university had rebuilt the collection.

Mosul Central Public Library - The Mosul Central Public Library includes the Sunni Muslim library, the library of the 265-year-old Latin Church and Monastery of the Dominican Fathers, and the Mosul Museum Library. Among the 112,709 books and manuscripts thought lost as a result of ISIL intentional destruction are a collection of Iraqi newspapers dating from the early 20th century, as well as maps, books, and collections from the Ottoman period; some of which were registered on a UNESCO rarities list. In April 2003, the library lost a third of its collection when it was vandalized and looted following the invasion of US forces, though some of the collection was saved by Mosul's residents. The library also had its own bookbinding and maintenance department to care for its collection.

Site Date: Mosul University Library - 1967 CE; Mosul Central Public Library - 1921 CE

Incident Summary: New photographs were released of damage to libraries in Mosul.

Incident Source and Description: On May 12, 2017, ASOR CHI received photographs of the Mosul University Central Library from a contact on the ground. Local activist group Mosul Eye also posted recent photographs and video of the library. The library shows severe structural damage from ISIL intentional destruction and US-led Coalition airstrikes, as well as evidence of fire damage.⁷⁶ On February 25, 2015 reports surfaced that ISIL ransacked the library and burned 100,000 books and manuscripts.⁷⁷

al-Fanar Media interviewed Dr. Obay al-Dewachi, President of Mosul University, who stated that almost all of the library's holdings were destroyed, as well as severe structural damage to the

⁷⁵ <http://www.al-fanarmedia.org/2017/05/rebuilding-mosuls-library-book-book/>

⁷⁶ <http://www.rudaw.net/english/middleeast/iraq/160120171>; <https://news.vice.com/article/the-us-led-coalition-bombed-the-university-of-mosul-for-being-an-islamic-state-headquarters>

⁷⁷ <https://www.theguardian.com/books/2015/feb/26/isis-destroys-thousands-books-libraries>

building itself. The library director states that “many of the library’s older manuscripts had been digitized and backed up on servers.”⁷⁸ Some manuscripts were also taken home with employees.

Starting in 2017, after the liberation of eastern Mosul, several groups are collecting books to send to Mosul, for both the university and public libraries. Mosul Eye has created a depository with the help of the Director of the Central Library at Mosul University in order to store any books received until they have the facilities to store the books.⁷⁹ They are also going through the libraries and salvaging what books they can, including rare manuscripts. A French institute in Marseille has pledged to donate about 20 tons of books to the campaign.⁸⁰ Bibliotheca Alexandrina has pledged 100,000 books to the Ashurbanipal Library, the Archaeology Department’s branch of Mosul University’s library.⁸¹ Basra University and Dijah University College in Iraq have offered support as well as books to help rebuild the library.⁸² On May 25, 2017 a group of students organized an “eye of Mosul” arts festival in front of the library to bring attention to the library as well as let people donate books.⁸³

Digitization projects to preserve what remains have also started. Many priests and imams started digitizing ancient and important manuscripts before smuggling them out of Mosul and into places like Erbil and Baghdad.⁸⁴ The amount of books destroyed has yet to be determined, as books are being returned by people who took them from the libraries to save them.⁸⁵ ASOR CHI contact stated that ISIL “probably burned all the foreign books, and books not suited for their ideology (history, geography, etc).” Our contact states that “Islamic and reference books located in these libraries may have been sold in the book market.” Our contact further states that the latter books were probably purchased by the book sellers and may be easy to track down and return to the collection.

For more on previous damage to the libraries, please see: **ASOR CHI Incident Report SHI 15-0017** in **WR 30**; **ASOR CHI Incident Report SHI 15-0017 UPDATE** in **WR 26-27**; **ASOR CHI Incident Report SHI 15-0035** in **WR 30** and **ASOR CHI Incident Report SHI 17-0035 UPDATE**

Pattern: Site Management: re-construction/clean-up.

Monitoring Recommendations and Mitigation Measures: ASOR CHI will continue to monitor reports of damage to libraries in Mosul, as well as the condition of other heritage sites located in regions subject to intense military activity.

IHI 17-0024 UPDATE

Report Date: May 1, 2017

Site Name: Hatra (al-Hadr) (الحضر)

Date of Incident: March 2015

Location: Ninawa Governorate, Iraq

Site Description: The city of Hatra — a large fortified urban center — was built by the Seleucid Empire in the third or second centuries BCE and was later conquered by the Parthians. During the first and second centuries CE it rose to prominence as a religious center and as a major trading city along the Silk Road. Roman Emperors Trajan and Septimius Severus unsuccessfully attempted to capture the city in 116 CE and 198 CE, respectively. Hatra eventually formed an alliance with the Romans in 230 CE, during the reign of Emperor Gordian III, but the city was conquered in 241 CE and destroyed by Ardashir I (226-42 CE), founder of the Sassanid dynasty.

The surviving remains of Hatra date between the first century BCE and the second century CE. The city is approximately 2 km in diameter and was protected by two large fortification walls, separated by a wide ditch with four fortified gates. The city center is marked by a temple complex dedicated to several Greco-Roman, Mesopotamian, Canaanite, Aramean, and Arabian deities, with monumental architectural remains blending Hellenistic, Roman, and Middle Eastern traditions. The archaeological site was successfully inscribed on the UNESCO World Heritage List in 1985. It was one of the best-preserved archaeological sites in Iraq prior to its capture by ISIL.⁸⁶

Site Date: 3rd/2nd century BCE – 241 CE

Incident Summary: New photographs and reporting provide additional detail on damage to site.

Incident Source and Description: On May 1, 2017 the BBC published an article providing new information on the condition of the ancient site of Hatra. The local head of antiquities in Iraq has stated that most buildings at the site are intact. A journalist from the Spanish news agency Efe reported that many statues at the site had been destroyed, buildings had fire damaged, and mortars had been stored in the courtyard. The reporter also reported the presence of deceased ISIL militants who had been killed at the site.⁸⁷ A Popular Mobilization Front commander described that the “exterior wall was damaged, shots fired by Daesh [ISIL] left holes in some buildings, two grand halls of the ancient palace suffered fires, and shrapnel from shells affected the western part.”⁸⁸

For previous reports on damage to Hatra, see **ASOR CHI Incident Report IHI 15-0068** in **Weekly Report 31**; **IHI 15-0068 Update** in **Weekly Report 35**; **IHI 17-0024** in **April Monthly Report 136-140**.

Pattern: Military activity: intentional performative destruction, reuse of ancient/historic structure, gunfire/light weaponry, vehicles/heavy weaponry, occupation/militarization.

IHI 17-0025

Report Date: May 5, 2017

Site Name: al-Nuri al-Kabir Mosque (جامع النوري)

Date of Incident: Unknown

Location: Mosul, Ninawa Governorate, Iraq

Site Description: Historical mosque famous for its leaning minaret.⁸⁹ The mosque is part of a complex that includes the famous al-Hadba' Minaret and a school named after the builder Nur al-Din al-Zangi Atabeg. According to World Monuments Fund, "In 1942, as part of a renovation campaign by the Iraqi Department of Antiquities, the mosque and madrasa were dismantled and reassembled according to a new plan, but the minaret remains as one of the few original elements of the medieval Nur al-Din complex."⁹⁰

Site Date: Original complex built in 1172 CE. Rebuilt in 1942 by the Iraqi Department of Antiquities.

Incident Summary: Video shows an RPG rocket striking dome of mosque.

Incident Source and Description: On May 5, 2017 BBC Arabic released video footage of ongoing Iraqi Security Forces efforts to recapture areas of Mosul from ISIL.⁹¹ Video footage depicts Iraqi Security Forces (ISF) firing what appears to be an RPG on al-Nuri al-Kabir Mosque, striking the dome on its southern face. The mosque appears to have been damaged, including prior damage to the dome. ISIL is rumoured to have stationed themselves inside the mosque, from which the group's leader Abu Bakr al-Baghdadi announced the creation of the 'caliphate'. The minaret of the mosque known as al-Hadba Minaret seems to be undamaged, however a black flag possibly belonging to ISIL has been positioned on top of the minaret. DigitalGlobe satellite imagery from May 22, 2017 does not show any damage to the visible portions of the mosque and minaret.

See associated reports in this Monthly Report for other mosques in Mosul that have been damaged by the recent fighting: **ASOR CHI Incident Report IHI 17-0031**; **ASOR CHI Incident Report IHI 17-0030**; **ASOR CHI Incident Report IHI 17-0029**.

Pattern: Military activity: explosives.

Monitoring Recommendations and Mitigation Measures: ASOR CHI will continue to monitor the condition of al-Nuri al-Kabir Mosque, as well as the condition of other heritage sites located in regions subject to ongoing aerial bombardment campaigns and intense military activity.

IHI 17-0026

Report Date: May 11, 2017

Site Name: Maltai Rock Relief (Halmata Cave Reliefs)

Date of Incident: May 8, 2017

Location: Halmata Cave, Dohuk Governorate, Iraq

Site Description: The Malthai Reliefs are a series of four Neo-Assyrian bas-reliefs carved into the cliff-side above the village of Malthai (in the suburbs of Dohuk) on the south bank of the Rubar-e Dohuk River. Three reliefs are grouped close together while the fourth is about 50 meters to their right. Each relief is 6 meters long and 2 meters high, and the same composition of nine figures is repeated on each panel with small variations.⁹² The scenes depict the king as a worshipper facing right toward a line of five deities--Assur, Ninlil, Sin, Anu (or Enlil), Shamash, Adad, and Ishtar--mounted on animals. Another figure of the king is depicted at the end of this row of deities, so that the line of divinities is flanked on either side by two identical royal images.⁹³ The king depicted is Sennacherib (reigned ca. 704-681 BCE), who had these and other rock reliefs carved at points along his northern canal system.⁹⁴

All four reliefs panels have sustained recent damage. However, the site has been damaged on previous occasions. Sometime during the 1st to 3rd centuries CE, for example, large holes were cut in two of the panels to make tombs. Another panel was damaged in the 1920s when antiquities thieves cut out part of another of the reliefs. This stolen section was later recovered and is now in the National Museum of Iraq in Baghdad.⁹⁵ The small holes seen on all four reliefs are apparently due to the porosity of the rock, and are not bullet-holes or otherwise manmade as has recently been claimed.⁹⁶

Site Date: Neo-Assyrian (ca. 680s BCE)

Incident Summary: New photographs show damage to the Maltai Reliefs.

Incident Source and Description: On May 8, 2017 Babylon FM published photographs showing damage to the Maltai Reliefs. They state that they “found the head [of one figure] drilled, and estimated that it had just happened as the dust was still in the air.” ASOR CHI in-country sources also reported that this damage occurred and included the same set of photographs. On May 23, 2017 Lamia Al Galiani Werr, a Research Associate at the School of Oriental and Asiatic Studies, London reported this damage was due to people with a grudge against Assyrian Christians and had nothing to do with ISIL damaging cultural heritage.⁹⁷

⁹⁶ <https://conflictantiquities.wordpress.com/2016/02/23/iraq-krq-dohuk-maltai-peshmerga-destruction-false-claims/>

⁹⁷ Iraqi Crisis List; May 23, 2017

On April 9, 2016 the relief was vandalized by the spray painting of a Kurdish flag. This occurred on the third and fourth panels. The new damage, including the defacement of Sennacherib, occurs on the first panel. The other damage also likely occurred on the first panel based on the stone discoloration, but an exact location has not been identified. An ASOR CHI source traveled to Maltai on May 19th, 2017 with the Director of Antiquities of Dohuk and stated that the relief was in relatively good condition. The source was not able to see the first panel, but did not record any vandalism like the erasing of faces on the other three panels. This supports the identification of the recent vandalism occurring on the first panel.

For more information of previous damage to the Maltai Reliefs, see **ASOR CHI Incident Report IHI 16-0005** in **Weekly Report 81-82**, and **ASOR CHI Incident Report IHI 16-0011** in **Weekly Report 89-90**.

Pattern: Vandalism.

Monitoring Recommendations and Mitigation Measures: ASOR CHI will continue to monitor the condition of Maltai and remote sites vulnerable to vandalism in Syria, Iraq, and Libya.

IHI 17-0027

Report Date: May 16, 2017

Site Name: Mar Kurkees Church (كنيسة مار كوركيس) (St. George Church)

Date of Incident: August 2014 - Present

Location: Telskuf (Teskopa), Ninawa Governorate, Iraq

Site Description: The ancient village of Telskuf was once home to 11,000 residents, the majority of whom were Chaldean Catholic Christians.⁹⁸ The village was temporarily held by ISIL in August 2014 before the group was pushed out by Kurdish Peshmerga forces. In May 2016, ISIL attacked the town but was unable to recapture it. The village has two churches: Mar Yacob (St. Jacob) and Mar Kurkees (St. George). The ruins of a 10th Century AD monastery (St. Ephrem's Monastery) are now used as the village cemetery. The village is known for making pottery and water vats, and used to be the main supplier of such items for Mosul and surrounding villages.⁹⁹

Site Date: Original date of the church is unknown. The church was demolished and rebuilt in 1955.¹⁰⁰ According to a first-hand account, the 'original' Mar Kurkees Church had a so-called 'ancient design' with three temples.¹⁰¹ It is a Chaldean Catholic Church.

Incident Summary: New video footage details the condition of Mar Kurkees Church (St. George).

Incident Source and Description: On May 16, 2017 the Shlama Foundation, a humanitarian organization, released video footage of Mar Kurkees (St. George Church) during a visit to Telskuf, Iraq.¹⁰² The church appears to have sustained minor damage, including damage to the furniture. According to the Shlama Foundation, ISIL militants occupied the church for one week. In addition, the village of Telskuf was under military occupation for more than two years following ISIL's encroachment into the Nineveh Plains. The church has now reportedly been restored and cleaned up in anticipation of residents returning to the village.

During the ISIL occupation of Telskuf, militants looted homes, destroyed buildings, removed all crosses from churches, and graffitied the walls of churches.¹⁰³ Residents who returned to the village after Peshmerga forces had recaptured it replaced the crosses, including one above Mar Kurkees Church.

Pattern: Military Activity: occupation; Site Management: re-construction/clean-up; Vandalism.

Monitoring Recommendations and Mitigation Measures: ASOR CHI will continue to monitor the condition of Mar Kurkees Church, as well as the condition of other heritage sites located in regions subject to intense military activity and habitation.

IHI 17-0028

Report Date: May 18, 2017

Site Name: Dair Mar Elia (Monastery of Saint Elijah) (دير مار إيليا)

Date of Incident: May 15, 2017

Location: Mosul, Ninawa Governorate, Iraq

Site Description: Dair Mar Elia was founded around 595 CE by Mar Elia (Saint Elijah). The main sanctuary of the monastery was built in the 11th century, and renovated in the 17th century.¹⁰⁴ In 1743 the Persians attacked the monastery, damaging the building and killing the monks. The monastery lay in ruins into the 20th century.¹⁰⁵ During WWI, the site was used as a place for refugees, and some buildings were rebuilt and used. In the 1970s the site became a base for the Iraqi Republican Guard.¹⁰⁶ In 2009, the US Army decided to try to restore the monastery.¹⁰⁷

Site Date: Build in 595 CE.¹⁰⁸

Incident Summary: New photographs show the current condition of Dair Mar Elia.

Incident Source and Description: On May 15, 2017 Archaeology in Iraq posted new photographs of the current condition of Dair Mar Elia to their Twitter account.¹⁰⁹ The photographs show the complete demolition of the site, with piles of rubble surrounding the foundation. The site was destroyed by ISIL between August 27, 2014 and September 28, 2014.¹¹⁰

See associated reports in this Monthly Report for other Christian sites that were damaged by ISIL in Northern Iraq: **ASOR CHI Incident Report IHI 17-0034**, **ASOR CHI Incident Report IHI 17-0033**.

Pattern: Site Maintenance: tourism/visitor activities.

Monitoring Recommendations and Mitigation Measures: ASOR CHI will continue to monitor new information and photographs on cultural heritage sites in northern Iraq, as well as the condition of other heritage sites located in regions that have recently been liberated.

IHI 17-0032

Report Date: May 29, 2017

Site Name: Mosul University

Date of Incident: January 18, 2017-Present

Location: Mosul, Ninawa Governorate, Iraq

Site Description: Mosul University was constructed in the 1960s, and is one of the largest educational and research centers in the Middle East, and second largest in Iraq. It was closed and reopened under ISIL command.

Site Date: 1967 CE

Incident Summary: New photographs and video show cleanup and reconstruction efforts taking place at Mosul University.

Incident Source and Description: On January 18, 2017 Mosul University was liberated from ISIL militants. The buildings were left severely damaged and hundreds of thousands of books were destroyed. Cleanup began in April 2017, and continues to today in order to open the university in September.¹¹³ On April 5, 2017 a local Facebook group published photos of the cleanup and renovation of some buildings. On April 17, 2017 France 24 reported that the buildings that housed the law, science, and chemistry faculties had been cleaned, but over 100 buildings had been damaged in the fighting. New footage published by a personal Youtube account on April 28, 2017 shows people going through the rubble in buildings and saving administrative documents and official papers including government agreements and property ownership documents. On May 22, 2017 a Mosul professor posted photographs of the cleanup efforts, showing the College of Archaeology hallway that had sustained fire damage, as well as a cleaned hallway of another building.

For more information on previous damage to Mosul University, see **ASOR CHI Incident Report IHI 15-0017** in **Weekly Report 30** and **ASOR CHI Incident Report IHI 16-0026** in **Weekly Report 105-106**.

Pattern: Site Management: re-construction/clean-up.

Monitoring Recommendations and Mitigation Measures: ASOR CHI will continue to monitor the progress of cleanup and reconstruction to Mosul University, as well as the condition of other educational sites located in recently liberated regions.

IHI 17-0033

Report Date: May 30, 2017

Site Name: Mar Mikhael Monastery (دير مار ميخائيل للسريان)

Date of Incident: June 2014–Present

Location: Hawi al-Kanisah Neighborhood, Mosul, Ninawa Governorate, Iraq

Site Description: Mar Mikhael Monastery lies roughly 7 km northwest of Mosul near the western bank of the Tigris. The site consists of an inner and outer complex surrounded by an enclosure wall. The monastery was founded in the 4th century and partially or completely destroyed in 1743.¹¹⁴ Father Romanos al-Alqushy rebuilt or renovated the complex in 1867. The monastery received additional renovation in 1956. The complex is cared for by the Chaldean Catholic Church in Iraq..

Site Date: 4th Century CE; reconstruction/renovation in 1867 and 1956

Incident Summary: Video footage and photographs show condition of and damage to Mar Mikhael Monastery.

Incident Source and Description: On May 16, 2017 al-Mosuliya Channel released video footage of Mar Mikhael Monastery.¹¹⁵ The video only depicts damage to the enclosure wall of the complex and the exterior faces of the structures within. The damage appears to be the result of aerial bombardment or artillery. The northeastern corner of the monastery sustained particularly heavy damage, likely from an airstrike. Footage from a courtyard within the complex shows damage near the main entrance to the monastery. According to a translation of an interview with an officer in the 3rd Brigade, 9th Division of the Iraqi Army, ISIL used Mar Mikhael Monastery as a command center and weapons depot.¹¹⁶ This officer also states that ISIL intentionally destroyed elements of the complex. The pattern of destruction is similar to patterns seen at other religious sites, particularly Yezidi and Christian, carried out by ISIL after capturing much of Ninawa Governorate.

See associated reports in this Monthly Report for other Christian sites that were damaged by ISIL: **ASOR CHI Incident Report IHI 17-0033; ASOR CHI Incident Report IHI 17-0028.**

Pattern: Site management: re-construction/clean-up; Military activity: explosives.

Monitoring Recommendations and Mitigation Measures: ASOR CHI will continue to monitor the condition of Mar Mikhael Monastery, as well as the condition of other heritage sites located in regions subject to ongoing aerial bombardment campaigns and intense military activity.

IHI 17-0034

Report Date: May 30, 2017

Site Name: Mar Gorgis Monastery (كنيسة دير مار كوركيس) (St. George/Mar Korkis/Mar Kurkees)

Date of Incident: December 2014–Present

Location: al-Arabi Neighborhood, Mosul, Ninawa Governorate, Iraq

Site Description: The Mar Gorgis Monastery was founded in the 10th century by the Assyrian Church of the East and was then rebuilt as a seminary by the Chaldean Catholic Church in 1846. The church is located on a hillside on the east bank of the Tigris in the northeastern section of Mosul, less than 5 km from the walls of the Assyrian site of Nineveh. The Chaldean Catholic Church, which is made up of people in Iraq who self-identify as Assyrian, uses Syriac as a liturgical language.

Site Date: 10th Century CE, rebuilt in 1931 CE

Incident Summary: Video footage and photographs show condition and damage to Mar Gorgis Monastery.

Incident Source and Description: On May 1, 2017 al-Mosuliya Channel released a video showing clean-up efforts at Mar Gorgis Monastery in al-Arabi neighborhood.¹¹⁷ The church has been heavily damaged and photographs show evidence of intentional destruction. The pattern of destruction is similar to patterns seen at other religious sites, particularly Yezidi and Christian, carried out by ISIL after capturing much of Ninawa Governorate. Possible explosives damage is also possible as entire floors have been destroyed. Photographs taken by Shlama Foundation show evidence of religious defacement and intentional destruction. According to one visitor to the site, the cemetery adjacent to the monastery has been destroyed.¹¹⁸

On May 29, 2017 Metro News published an article and photographs showing the re-construction and clean-up efforts.¹¹⁹ These efforts were carried out by both Muslim and Christians who live in the neighborhood surrounding the church.

Mar Gorgis Monastery was the site of ISIL intentional destruction between December 2014 and March 2015. The destruction was captured on film by ISIL and released as part of the group's propaganda campaign. For more information on previous damage to Mar Gorgis Monastery, see **ASOR CHI Incident Report IHI 15-0050** in **Weekly Report 32**.

See associated reports in this Monthly Report for other Christian sites that were damaged by ISIL: **ASOR CHI Incident Report IHI 17-0033**; **ASOR CHI Incident Report IHI 17-0028**.

Pattern: Site management: re-construction/clean-up.

IHI 17-0035**Report Date:** May 31, 2017**Site Name:** Baha'a al-Deen al-Sumaeda'e Mosque (جامع بهاء الدين الصميدعي)**Date of Incident:** May 11, 2017 - May 20, 2017**Location:** al-Rifa'i Neighborhood, Mosul, Ninawa Governorate, Iraq**Site Description:** Mosque**Site Date:** Unknown**Incident Summary:** DigitalGlobe satellite imagery shows damage to mosque.

Incident Source and Description: During the offensive to retake Mosul from ISIL, multiple mosques in the city have been damaged. Between May 11 and May 20, 2017 DigitalGlobe satellite imagery shows Baha'a al-Deen al-Sumaeda'e Mosque was damaged. The minaret appears to be missing some of the facade, though it is still standing. The western side of the mosque also appears to be damaged. The road dividers and the adjacent buildings also show severe damage. On May 14, 2017 three suicide bombers attacked Iraqi Security Forces (ISF) in the neighborhood of al-Rifa'i. ISIL later released video showing explosions occurring in the neighborhood.¹²⁰ The neighborhood was liberated by ISF on May 18, 2017.¹²¹

See associated reports in this Monthly Report for mosques which were also damaged during the same offensive: **ASOR CHI Incident Report IHI 17-0036** and **ASOR CHI Incident Report IHI 17-0037**.

Pattern: Military Activity: explosives.

Monitoring Recommendations and Mitigation Measures: ASOR CHI will continue to monitor the condition of Baha'a al-Deen al-Sumaeda'e Mosque, as well as the condition of other heritage sites located in regions subject to ongoing aerial bombardment campaigns and intense military activity.

IHI 17-0036**Report Date:** May 31, 2017**Site Name:** al-Najjar Mosque (جامع النجار)**Date of Incident:** May 11, 2017 - May 20, 2017**Location:** al-Rifa'i Neighborhood, Mosul, Ninawa Governorate, Iraq**Site Description:** Mosque**Site Date:** Unknown**Incident Summary:** DigitalGlobe satellite imagery shows damage to mosque.

Incident Source and Description: During the offensive to retake Mosul, multiple mosques in the city have been damaged. Between May 11 and May 20, 2017 DigitalGlobe satellite imagery shows damage to al-Najjar Mosque. The damage is concentrated on the southern and eastern sides of the mosque. The triangular curb in front of the mosque has been completely destroyed. On May 14, 2017 three suicide bombers attacked Iraqi Security Forces in al-Rifa'i neighborhood and ISIL released video showing explosions occurring in the neighborhood.¹²² The neighborhood was liberated on the May 18, 2017.¹²³

The mosque was reportedly damaged by Coalition Forces on March 4, 2017 but no photographs of the damage were released at that time.¹²⁴

Incident Report: Libya

LHI 17-0002

Report Date: May 29, 2017

Site Name: Tell B 10

Date of Incident: Between January and September 2013

Location: Silin Coast (سيلين), Tripolitania, al Khums Governorate, Libya

Site Description: This area of coast is well known for its concentration of archaeological sites, particularly the Roman Villa Silin. Tell B 10 was identified during a Department of Antiquities training survey in 2012 and on the basis of surface scatter and the presence of substantial stone blocks, it appeared to be part of the Roman settlement associated with Silin.¹²⁷

Site Date: Unknown, likely Roman Era

Incident Summary: Tell B 10 has been destroyed and replaced by a modern villa.

Incident Source and Description: On May 29, 2017 a member of the Tripoli Office of the Libyan Department of Antiquities visited Tell B 10, and reported that the site had been destroyed. DigitalGlobe satellite imagery shows a new villa has been constructed on top of the site. The Silin coast, one of Libya's premier concentrations of archaeological sites and natural beauty, has been heavily developed since 2013. This development has occurred without the archaeological review mandated by Libyan law, and has often encroached upon the public lands surrounding the Roman Villa Silin.

Pattern: Development disturbance: construction.

Monitoring Recommendations and Mitigation Measures: ASOR CHI will continue to monitor the Silin Coast for signs of ongoing destruction of archaeological sites, as well as the condition of other heritage sites located in regions subject to ongoing developmental threats.

Sources:

This incident has been reported by the Tripoli Office of the Libyan Department of Antiquities.

LHI 17-0003

Report Date: May 15, 2017

Site Name: Roman Wall

Date of Incident: Early May 2017

Location: Derna, Cyrenaica, Derna Governorate, Libya

Site Description: Remains of the Roman-era fortifications guarding the mouth of Wadi Derna leading into Derna from the south.

Site Date: Roman Era

Incident Summary: Ongoing urban encroachment and excavation have damaged the Roman Wall.

Incident Source and Description: In early May, 2017, the Derna Office of the Libyan Department of Antiquities received reports that there is illegal excavation occurring at the base of the Roman Wall. As early as 2013, residents in the southern area of Derna began to remove sections of the Roman Wall in order to build new houses. Some of the stones are incorporated into the foundations of the new houses and in other cases, part of the ancient wall is being re-used as an exterior wall of a house. The wall is also being dismantled in order to create room for more houses to be developed. This construction has continued to the present.

Pattern: Development disturbance: construction; Illegal excavation.

Monitoring Recommendations and Mitigation Measures: ASOR CHI will continue to monitor Derna for signs of ongoing destruction of archaeological sites, as well as the condition of other heritage sites located in regions subject to ongoing developmental threats.

Sources:

This incident has been reported by the Derna Office of the Libyan Department of Antiquities.

LHI 17-0004

Report Date: May 21, 2017

Site Name: Funduq al Hoji

Date of Incident: March 2017

Location: Old City Tripoli, Tripolitania, Tarabulus Governorate, Libya

Site Description: This house was one of the prominent landmarks of the Old City of Tripoli.

Site Date: Ottoman Era

Incident Summary: Private developers have torn down a historic building.

Incident Source and Description: An ASOR CHI source reported that private developers have torn down Funduq al Hoji, a historic building in the Old City of Tripoli, in order to build a new structure. In doing so, the developers have circumvented Libyan heritage law. The Old City of Tripoli is under general threat from private development, as historic structures are replaced with new buildings.

DigitalGlobe satellite imagery shows the new construction of a high rise building on the site of the Funduq al Hoji. This destruction and new construction occurred between February and March 2017.

Pattern: Development disturbance: construction.

Monitoring Recommendations and Mitigation Measures: ASOR CHI will continue to monitor the Old City of Tripoli for signs of ongoing development in the historic core, as well as the condition of other heritage sites located in regions subject to ongoing developmental threats.

Satellite Imagery and Geospatial Analysis

The city of Mosul is still at the center of the Iraqi front of the conflict, especially on the west bank in the Old City. The ongoing bombardment and street warfare continues to leave its mark on the historic and culturally significant locations within the city, none more so than the area of the souqs. Much of this damage has occurred in the last year with the largest amounts during the month of March 2017, as visible from DigitalGlobe satellite imagery. Since May 2016, the streets and courtyards of this area have been systematically covered with metal roofs, including in the final phase over Nineveh Street and Ghazi Street. Between January 16 and March 8, 2017 some of these metal roof pieces were removed and a few small holes from shelling are visible in others. During the month of March, severe aerial bombardment damaged much of the area including Bab al-Tub Police Headquarters, Suq al-Alwah Mosque, and Bab al-Tub Mosque. The damage is so severe that pieces of the metal roofing are visible floating in the Tigris River. As of May 22, 2017 the ongoing conflict has further damaged these sites as well as the al-Aghawat Mosque, al-Pasha Mosque, and the former site of the Madrasa of the 'Abdal Mosque.¹²⁸ Though this part of the city is now liberated, this small portion of the city has been irreparably damaged.

The area of the souqs in Mosul, with many previously uncovered courtyards and streets covered in metal roofing. (DigitalGlobe; May 9, 2016)

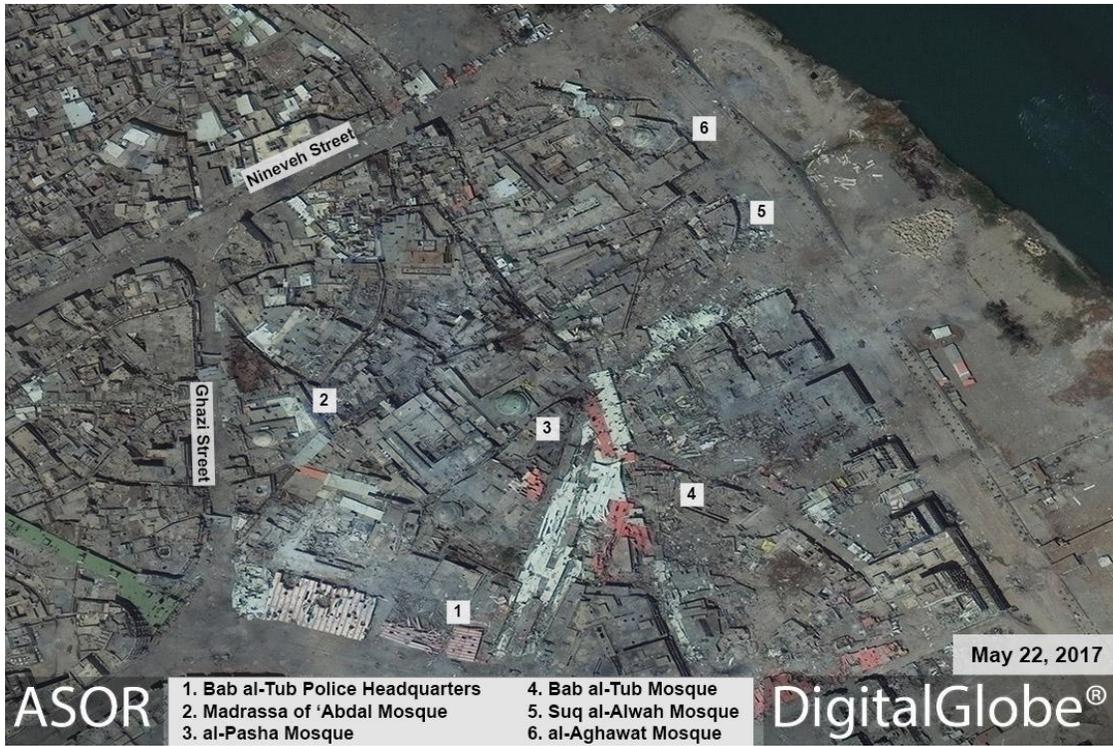

¹²⁸ The Madrasa was previously razed to the ground in an intentional destruction and new construction was built on top of it.

Minimal damage due to shelling noted with the red arrows. Some damage to the Suq al-Alwah (5) due to a nearby explosion and visible bomb impact crater (DigitalGlobe; March 8, 2017)

Severe damage over the entire area with visible damage to the Bab al-Tub Police Headquarters (1) and Bab al-Tub Mosque (4) and additional damage to the Suq al-Alwah Mosque (5) (DigitalGlobe; March 30, 2017)

Additional damage and deterioration of the area with new damage to the al-Pasha Mosque (3)
(DigitalGlobe; May 22, 2017)

SNHR Vital Facilities Report:

On May 10, 2017 the Syrian Network for Human Rights (SNHR) released its vital facility report for April 2017. According to SNHR, there were no less than 102 attacks against vital civilian facilities. The sites attacked include 15 mosques and one archaeological site.¹²⁹

- April 4, 2017 reported SARG warplanes fired “a number of missiles” on al-Naasan Mosque in Eastern Ghouta, Douma City resulting in the partial destruction of the mosque and damage to the mosque’s furniture. The strike also resulted in casualties. **ASOR CHI Incident Report SHI 17-0055 in April Monthly Report.**
- On April 4, 2017 reported SARG artillery fired shells at al-Khoulani Mosque in the town of Hamouriya, Eastern Ghouta resulting in a hole in the mosque dome, as well as moderate damage of the building and its furniture.
- On April 4, 2017 suspected Russian aircraft fired a missile at al-Rawda Mosque in Salqin, Idlib Governorate resulting in high civilian casualties, partially destroying the mosque, and causing moderate damage to the furniture. As a result of the strike, the mosque was rendered inoperable. **ASOR CHI Incident Report SHI 17-0066 in April Monthly Report.**
- On April 7, 2017 reported SARG and Russian airstrikes fired missiles at Arbin al-Kabir Mosque in Arbin, Rif Dimashq Governorate causing partial destruction to the building, heavy damage to the furniture and cladding materials, and rendering the mosque inoperable. **ASOR CHI Incident Report SHI 17-0056 in April Monthly Report.**
- On April 7, 2017 suspected Russian airstrikes fired two missiles near al-Thahiriya Mosque, Sahl al-Rouj, Idlib Governorate. The missiles fell 50 meters from the mosque causing slight damage to the building and its furniture. **ASOR CHI Incident Report SHI 17-0067 in April Monthly Report.**
- On April 8, 2017 reported Russian aircraft fired a missile on Hamza Bin Abd al-Mutalleb Mosque in the area of al-Mashiya, al-Gharbi Neighborhood, Jisr al-Shughour, Idlib Governorate. The strike caused partial destruction to the mosque and moderate damage to the furniture. **ASOR CHI Incident Report SHI 17-0069 in April Monthly Report.**
- On April 12, 2017 reported SARG artillery fired shells at al-Qadim Mosque in Kafr Batna, Eastern Ghouta, causing moderate damage to the building and furniture. **ASOR CHI Incident Report SHI 17-0057 in April Monthly Report.**
- On April 17, 2017 reported SARG artillery fired shells at an unnamed mosque in Harasta City, Rif Dimashq Governorate.
- On April 18, 2017 reported SARG and Russian missiles struck near Ali bin Abu Taleb Mosque in Darat Ezza City, Aleppo Governorate. The missiles struck a school located approximately 50 meters from the mosque, causing moderate damage to the mosque.
- On April 24, 2017 reported SARG warplanes fired a missile near the Grand Mosque City, Homs Governorate. The strike caused heavy damage to the mosque building and furniture, and the mosque was rendered out of commission. **ASOR CHI Incident Report SHI 17-0063 in April Monthly Report.**
- On April 25, 2017 reported SARG and Russian missiles struck Musa’b bin Umair Mosque in Tawama, Aleppo Governorate. The strike created a hole in the mosque roof and caused moderate damage to the furniture and cladding materials. **ASOR CHI Incident Report SHI 17-0060 in April Monthly Report.**
- On April 27, 2017 reported Russian aircraft fired two missiles near Abu Bakr al-Sidiq Mosque in al-Janoubi Neighborhood, Ma’ar Shoureen, Maaret al-Numan, Idlib Governorate. The strike killed civilians, partially destroyed one side of the mosque fence, and damaged

¹²⁹ <http://sn4hr.org/blog/2017/05/10/40410/>

the furniture and cladding material at the mosque. **ASOR CHI Incident Report SHI 17-0075 in April Monthly Report.**

- On April 28, 2017 reported SARG and Russian warplanes fired missiles on Abu Oabida Ibn al-Jarrah Mosque in Kafr Zaita, Hama Governorate causing the destruction of the mosque and rendering the building out of commission. On April 21, 2017 a SARG helicopter barrel bomb struck near the mosque. **ASOR CHI Incident Report SHI 17-0070 in April Monthly Report.**
- On April 27, 2017 suspected Russian warplanes fired two missiles at al-Daraj Historical Public Bath in Sarmin, Idlib Governorate causing heavy damage to the site. **ASOR CHI Incident Report SHI 17-0072 in April Monthly Report.**

Syrian Network For Human Rights Videos:

Beginning March 23, 2016 the Syrian Network for Human Rights (SNHR) began publishing back-dated videos on YouTube of combat damage inflicted on schools, bakeries, hospitals, marketplaces, and other types of infrastructure and civilian sites. ASOR CHI will continue to monitor the SNHR YouTube channel and archive videos that document heritage destruction. The following sites have been documented as damaged in the videos released during the current reporting period:

1. Abu Bakr al-Sadeiq Mosque, damaged by reported SARG shelling on May 17, 2017. **ASOR CHI Incident Report SHI 17-0083 in May Monthly Report 2017.**¹³⁰
2. Hamouriya Grand Mosque, damaged by reported SARG shelling on May 17, 2017. ASOR CHI Incident Report **ASOR CHI Incident Report SHI 17-0084 in May Monthly Report.**¹³¹
